1 Disclaimer

The data provided in this Readers' Guide is provided for informational purposes only and does not contain information related to the settlement of the MISO's Energy Markets and shall not be relied upon for such purpose. Any party relying on the data provided in this report is doing so at its own risk. The MISO shall not be liable for any consequences or damages to any party relying on the data provided herein.

2 Introduction

The document provides an explanation or Readers' Guide to understanding the MISO Generation Fuel Mix Report. For questions or comments regarding the report please contact Client Relations at 866-296-6476 (Monday-Friday, 8 a.m. – 5 p.m. ET) or email at clientrelations@misoenergy.org.

3 Report

3.1 Description

The Generation Fuel Mix Report is designed to provide Real-Time hourly State Estimator generation megawatts supplied by various fuel types in the MISO footprint (MISO total and by region). It also provides the Day-Ahead Cleared Generation Fuel mix by region. This data is available for the prior Market day.

3.2 Report Availability Time

The report is produced 7 days a week, 365 days a year, and is posted publicly by 10:00 AM Eastern Standard Time every day in Microsoft Excel format.

The report is posted to Market Reports area of the MISO website: [MISO internet site](#).

To locate the data files, choose "Summary" in the Report Type dropdown box, enter "Generation Fuel Mix" in the Report Name field, and date in the Publish Date field, and click on the search button. The list of historical files will show in the results.

3.3 How to use this Report

The guide includes an example of Generation Fuel Mix Report in tabular format in the Report Layout section of the document. The column and row headers are defined in the Data Definitions section of the document.

3.5 Data Definitions - Real-Time State Estimator Generation Fuel Mix

Column Name	Definition / Description / Calculation	
North	The Generation Fuel Mix in the North region in the MISO footprint for prior Market day.	
Central	The Generation Fuel Mix in the Central region in the MISO footprint for prior Market day.	
South	The Generation Fuel Mix in the South region in the MISO footprint for prior Market day.	
MISO	The Generation Fuel Mix in the whole MISO footprint for prior Market day.	
COAL	The hourly RT SE Generation (in MW) from fuel type COAL for prior Market day.	These 7 fuel types are repeated for each region.
GAS	The hourly RT SE Generation (in MW) from fuel type GAS for prior Market day.	
HYDRO	The hourly RT SE Generation (in MW) from fuel type HYDRO for prior Market day.	
NUCLEAR	The hourly RT SE Generation (in MW) from fuel type NUCLEAR for prior Market day.	
WIND	The hourly RT SE Generation (in MW) from fuel type WIND for prior Market day.	
SOLAR	The hourly RT SE Generation(in MW) from fuel type SOLAR for prior Market day.	
OTHER	The hourly RT SE Generation (in MW) from fuel types Other for prior Market day. “Other” fuel type includes generation from fuels: Battery, Coal/Gas, Oil, Oil/Gas, Pet Coke, Waste, Other	
Total MW	The hourly Total Generation in MW for each region and the whole MISO footprint for prior Market day.	
The MW values	The values within the file are Megawatts.	

Data Definitions - Day-Ahead Cleared Generation Fuel Mix

Column Name	Definition / Description / Calculation	
North	The Generation Fuel Mix in the North region in the MISO footprint for prior Market day.	
Central	The Generation Fuel Mix in the Central region in the MISO footprint for prior Market day.	
South	The Generation Fuel Mix in the South region in the MISO footprint for prior Market day.	
MISO	The Generation Fuel Mix in the whole MISO footprint for prior Market day.	
COAL	The hourly DA Cleared Generation (in MW) from fuel type COAL for prior Market day.	These 7 fuel types are repeated for each region.
GAS	The hourly DA Cleared Generation (in MW) from fuel type GAS for prior Market day.	
HYDRO	The hourly DA Cleared Generation (in MW) from fuel type HYDRO for prior Market day.	
NUCLEAR	The hourly DA Cleared Generation (in MW) from fuel type NUCLEAR for prior Market day.	
WIND	The hourly DA Cleared Generation (in MW) from fuel type WIND for prior Market day.	
SOLAR	The hourly DA Cleared Generation (in MW) from fuel type SOLAR for prior Market day.	
OTHER	The hourly DA Cleared Generation (in MW) from fuel types Other for prior Market day. “Other” fuel type includes generation from fuels: Battery, Coal/Gas, Oil, Oil/Gas, Pet Coke, Waste, Other	
Total MW	The hourly Total Generation in MW for each region and the whole MISO footprint for prior Market day.	
The MW values	The values within the file are Megawatts.	

The data in this report is for MISO footprint generation only and excludes pseudo-tie generation.
